

# Installing HEC-RAS on Windows 10

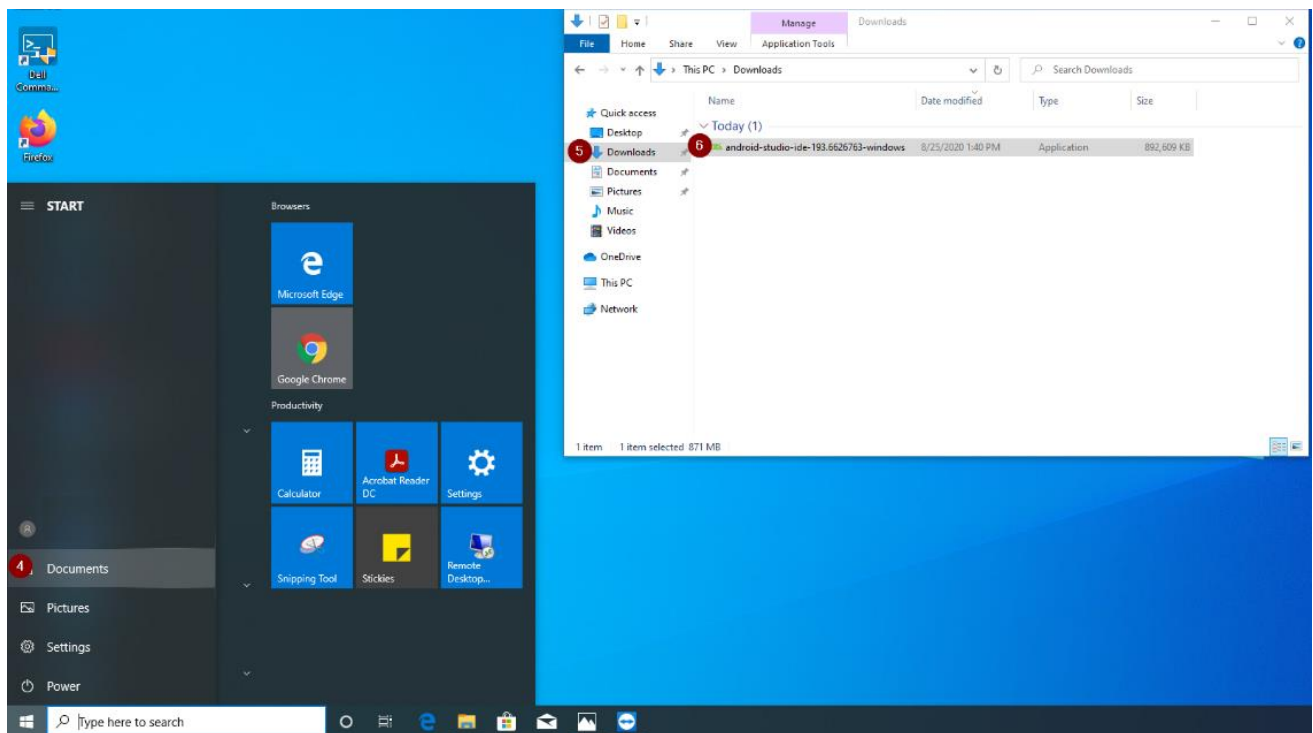

By Engineering IT

February 4, 2021

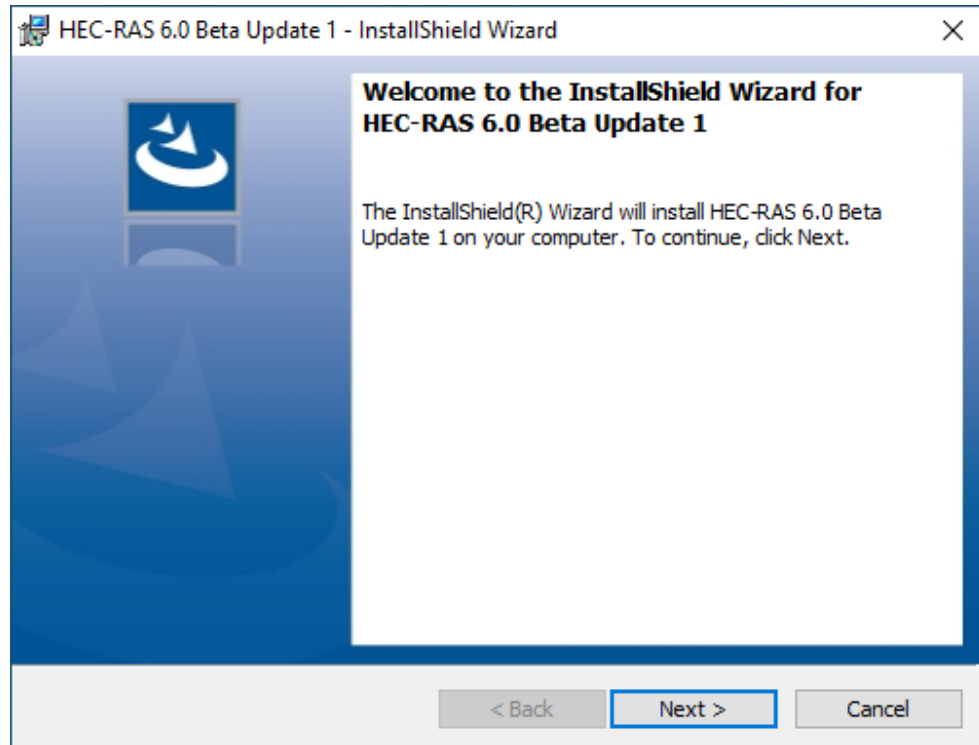

1. Open a web browser and go to <https://www.hec.usace.army.mil/software/hecras/download.aspx>
2. Click "Download HEC-RAS 6.0" in the center of the webpage.

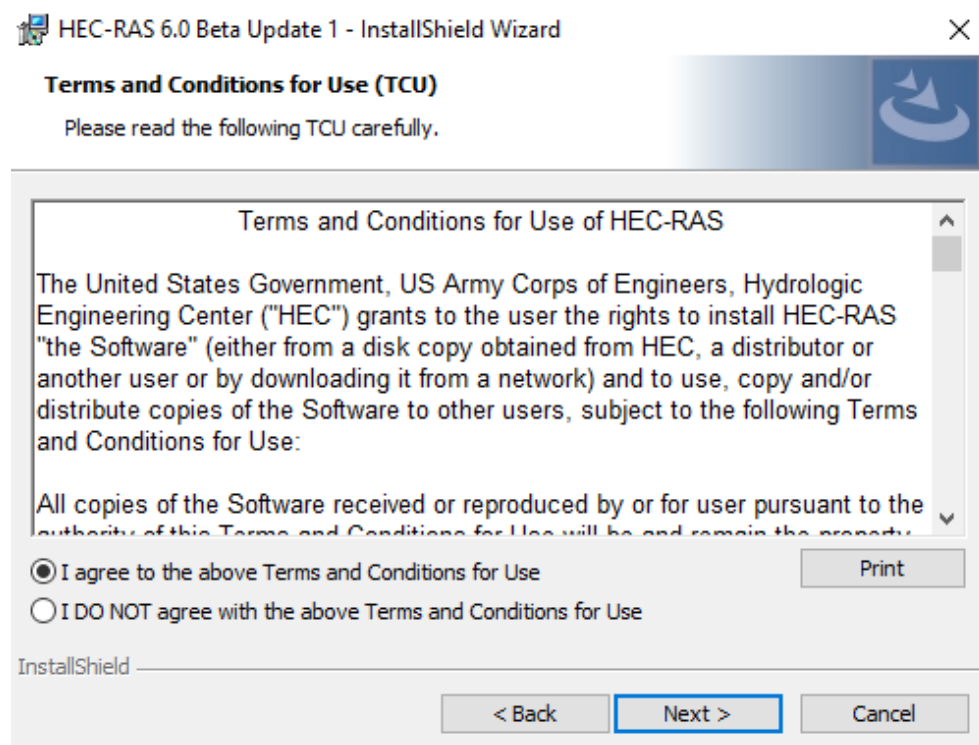

3. Navigate to your "Downloads" Folder, by clicking "Start" and then clicking "Documents"
4. Under Quick Access on the left hand side click "Downloads"
5. Launch "HEC-RAS\_60\_Setup.exe"

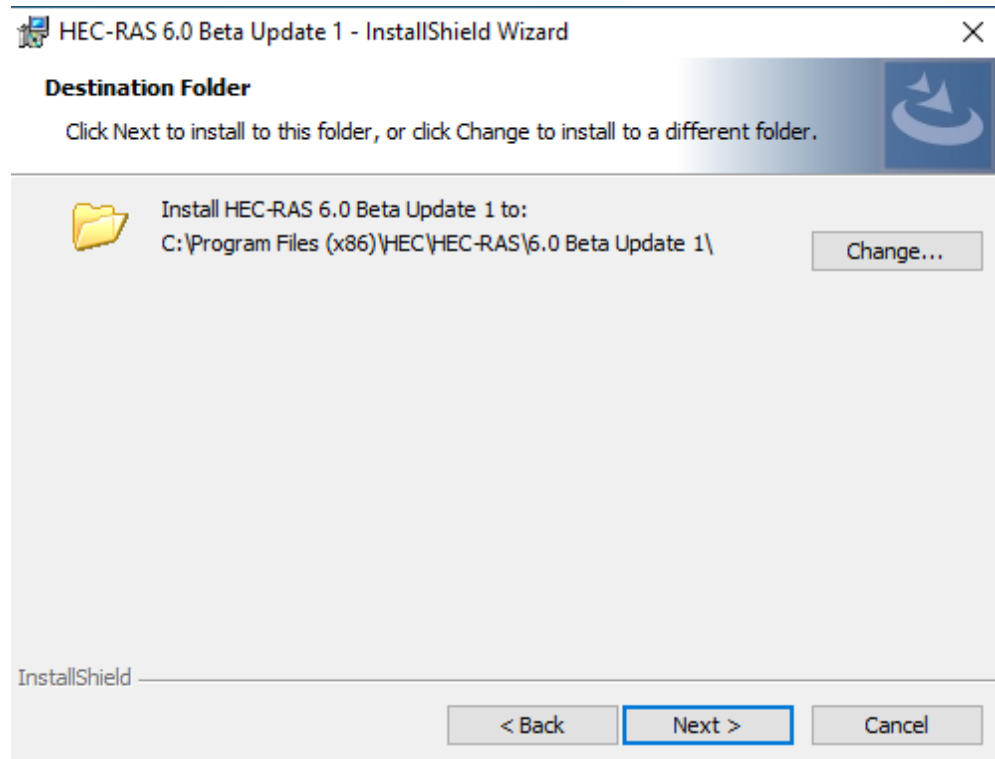

6. You will be greeted by the Installers welcome screen. Click “Next” to continue.

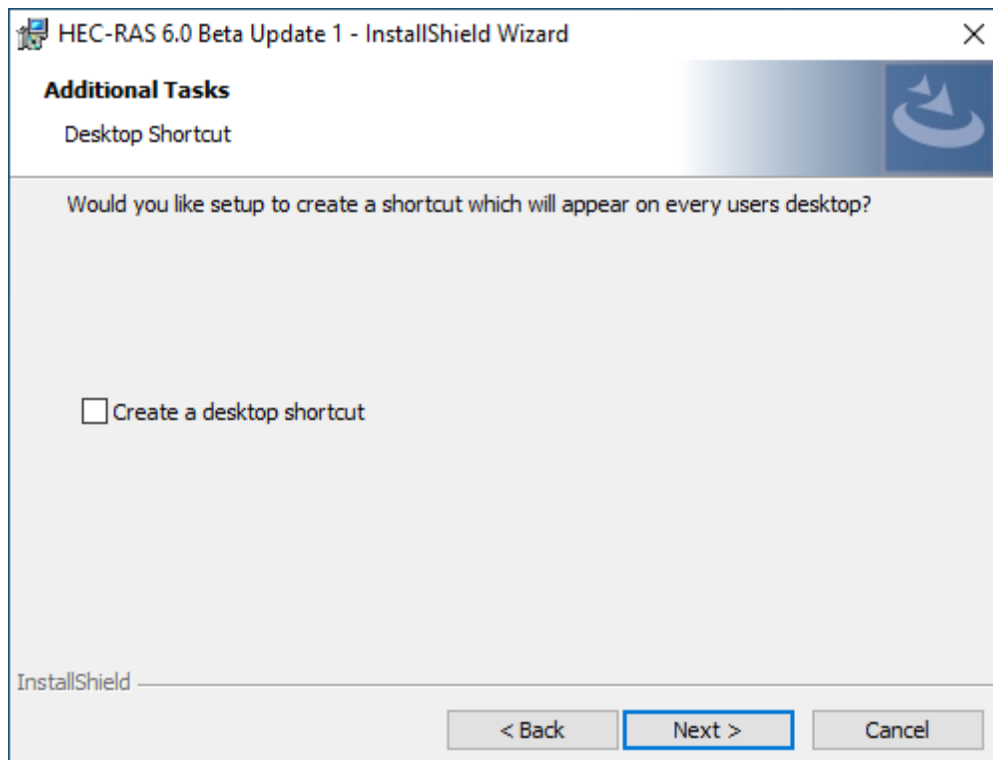

7. You will then see the Terms and Conditions page, select “I agree” and click “Next” to continue.

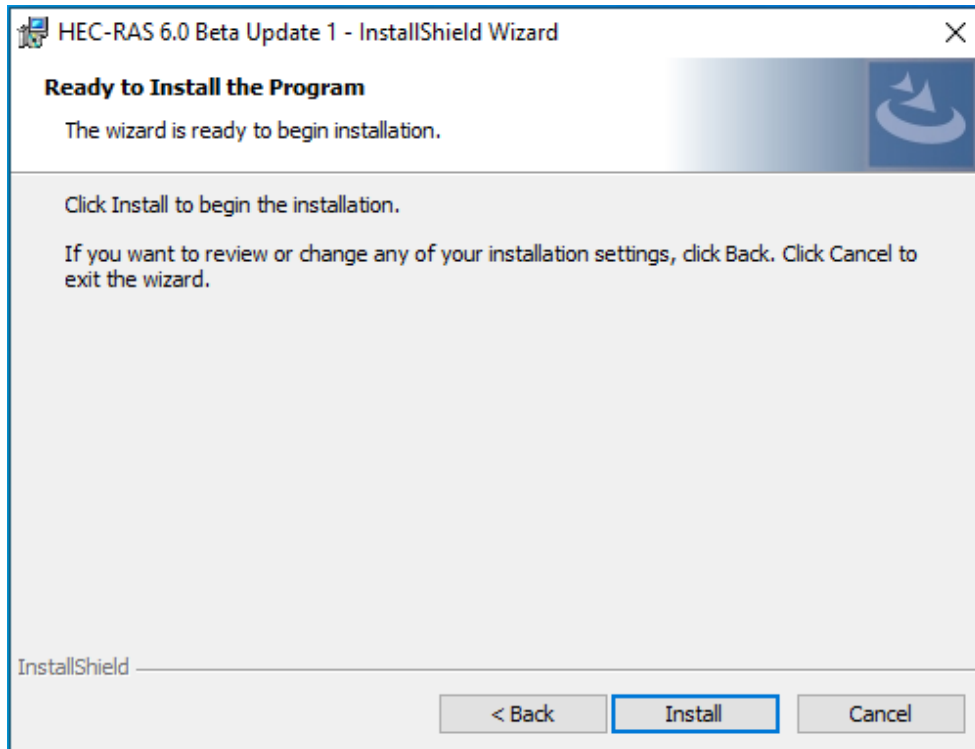

- The following screen will be for setting where you would like HEC RAS to install to. We will use the default destination, Click "Next" to continue.

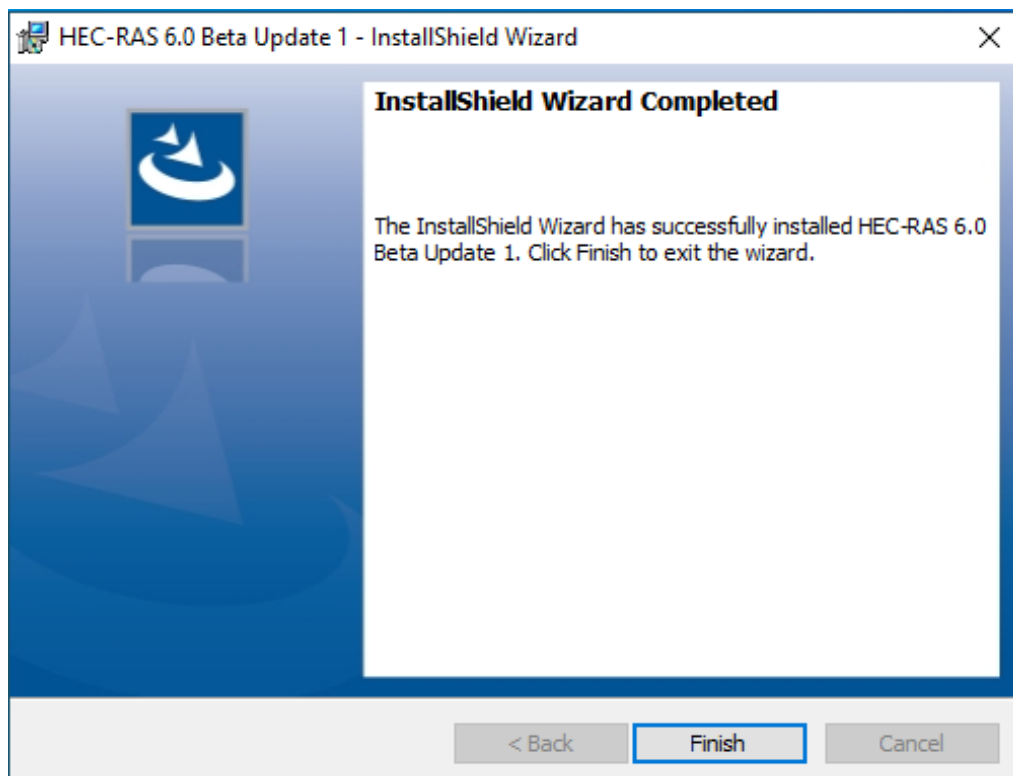

- The following screen will ask if you would like a shortcut added to desktop, Click "Next" to continue.

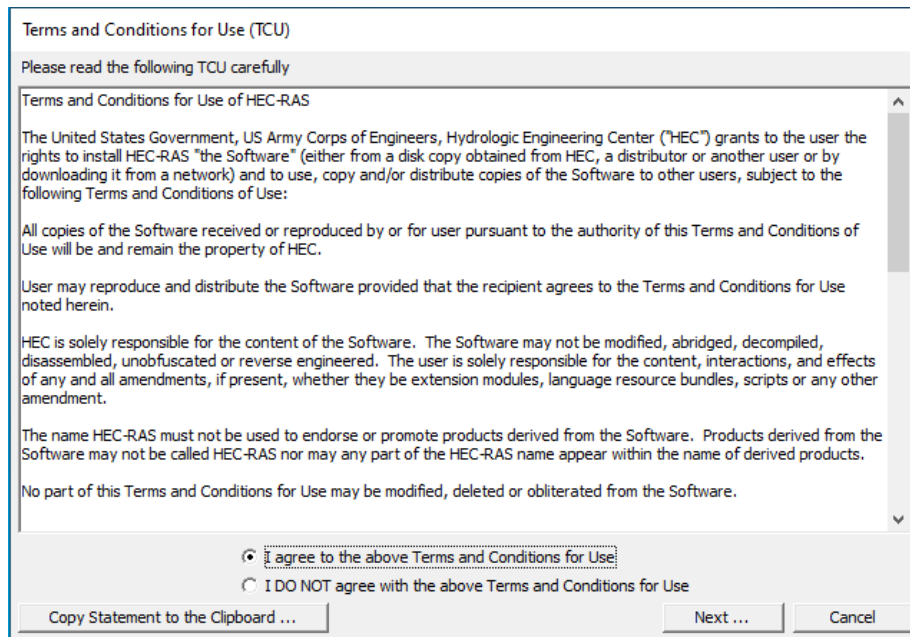

10. The installer will now run, Click “Install” to continue.

11. After HEC-RAS is done installing, click “Finish”

12. You will be greeted by the “Terms and Conditions Screen. Select “I Agree...” and then Click “Next” to continue.

13. HEC-RAS is now ready for use.
