

## Detailed Steps:

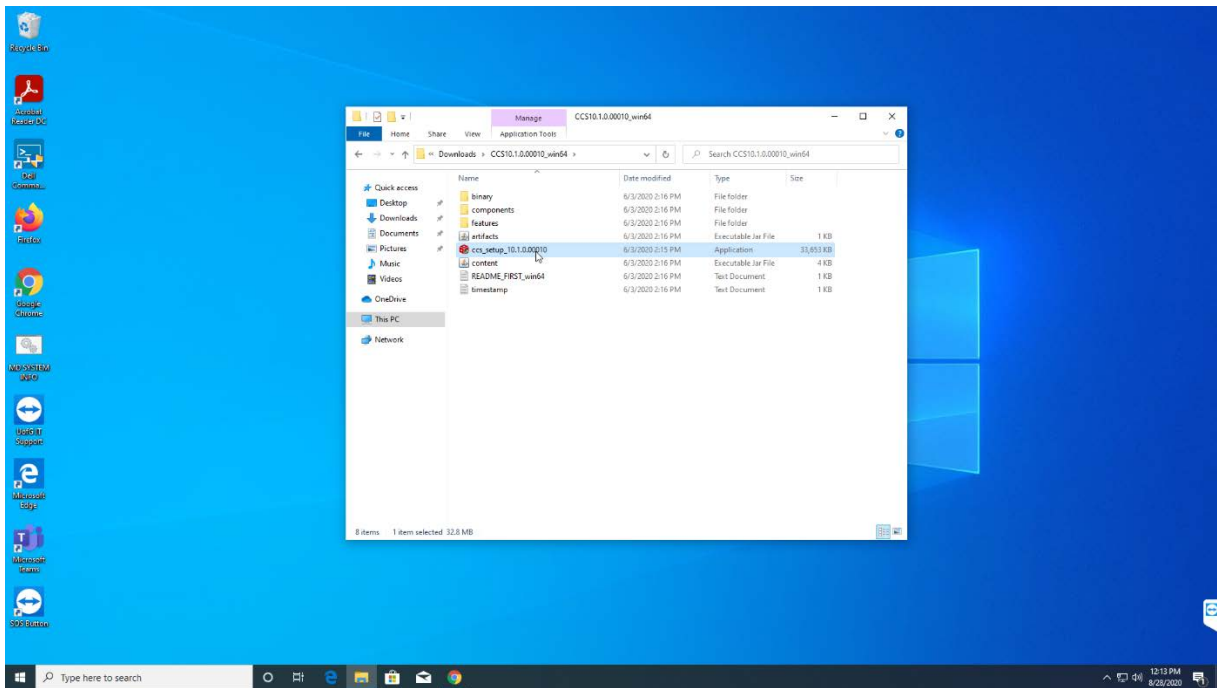

1. Open a web browser and go to [www.ti.com/tool/download/CCSTUDIO](http://www.ti.com/tool/download/CCSTUDIO)
2. Click “Windows single file installer for CCS IDE” on the left hand side.

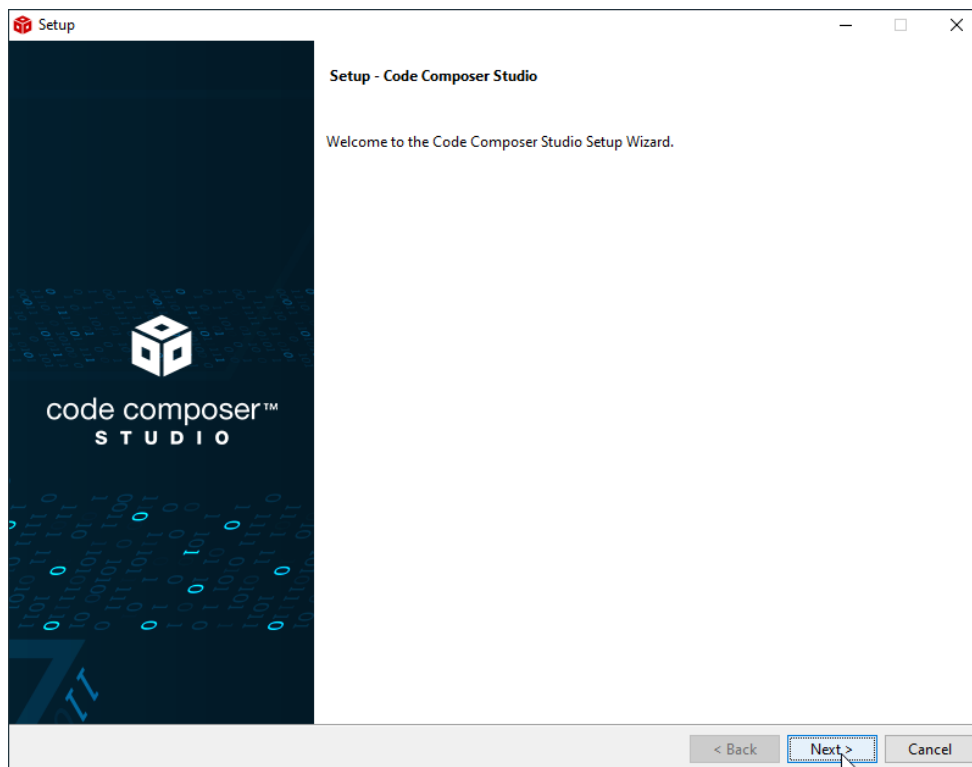

3. Navigate to your “Downloads” Folder, by clicking “Start” and then clicking “Documents”
4. Under Quick Access on the left hand side click “Downloads”
5. Right click on “CCS10.1.0.00010\_win64” and select “Extract all”

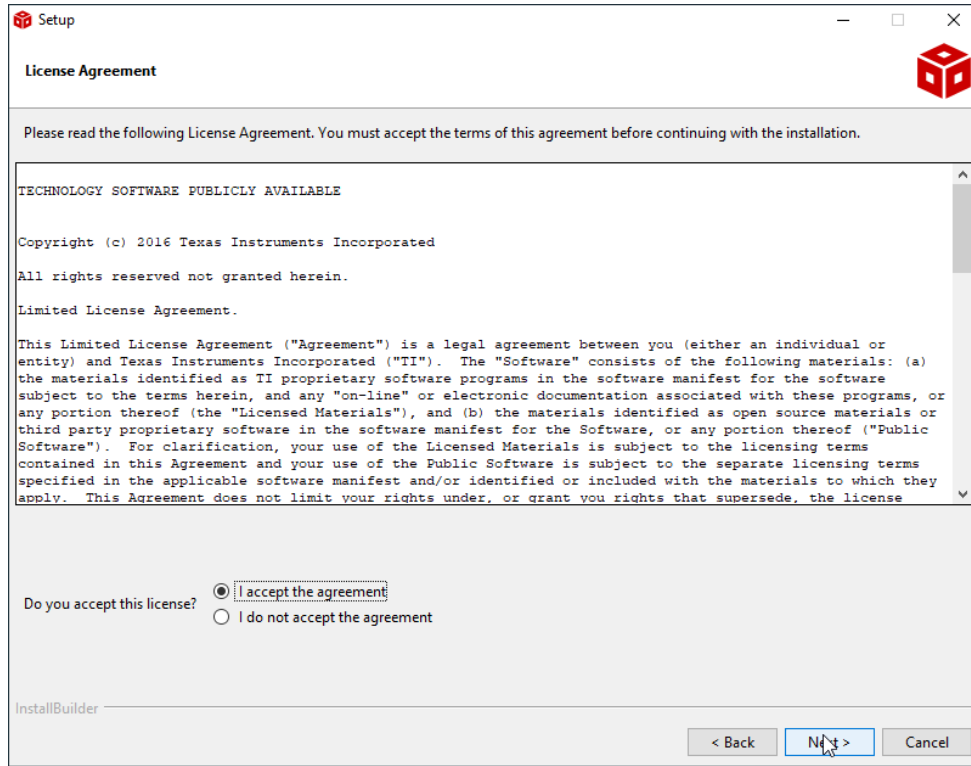

6. Navigate to the newly extracted file and click “ccs\_setup\_10.1.0.00010” to launch the installer.

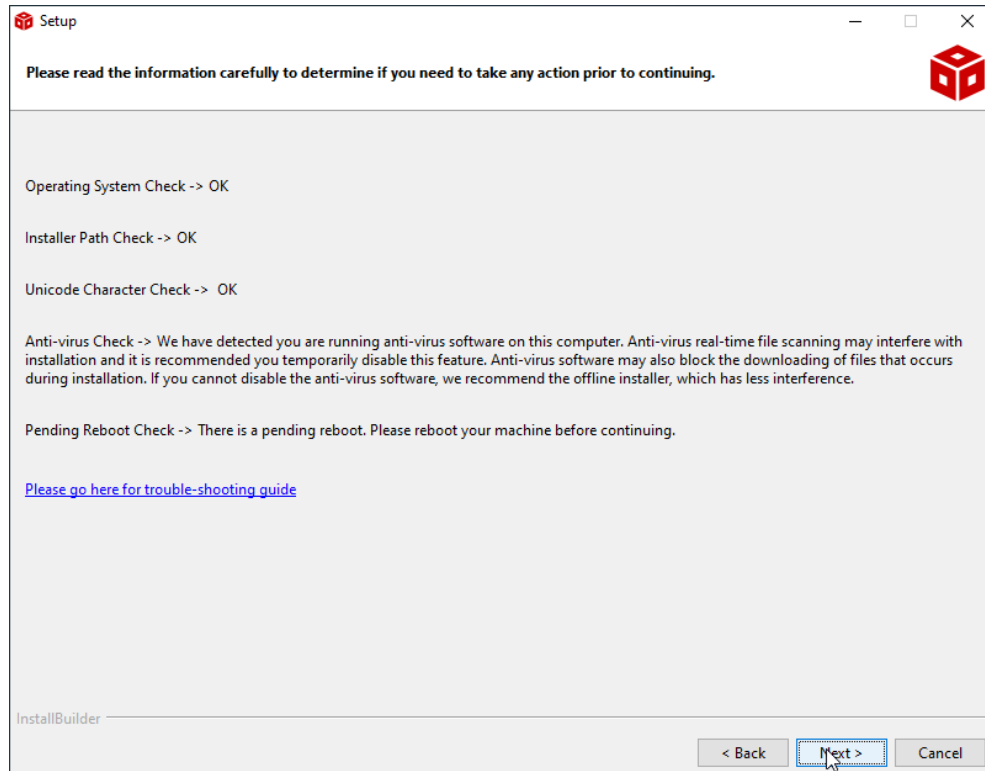

7. You will be greeted by the Installers welcome screen. Click “Next” to continue.

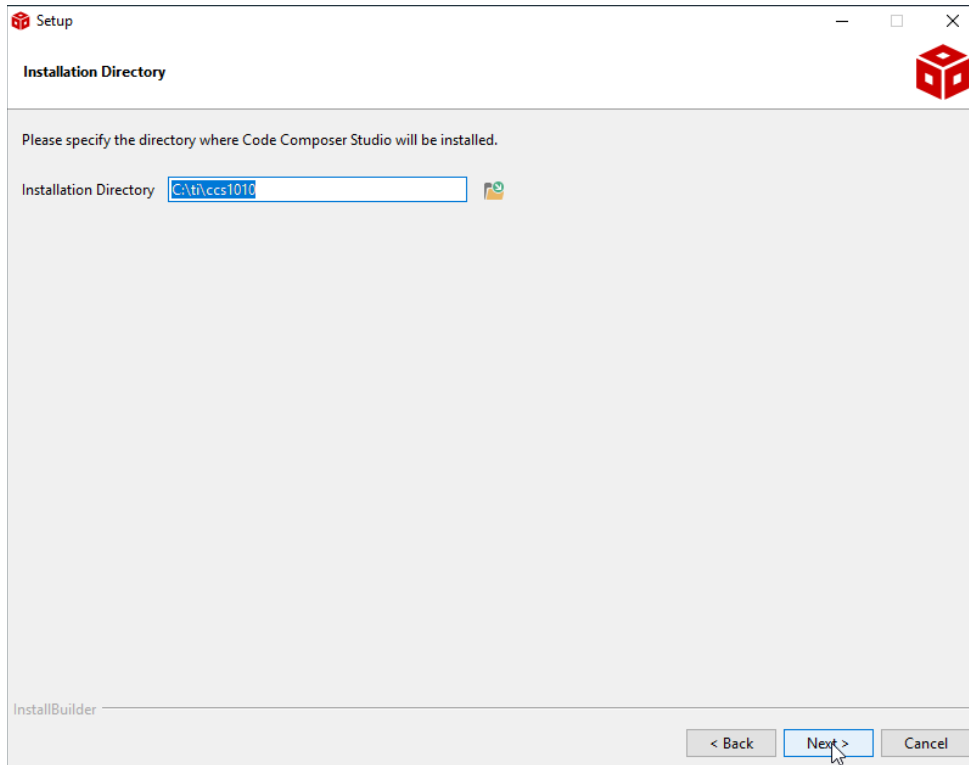

8. You will then see the “License agreement”, please read this, select “I Accept” and click “Next” to continue.

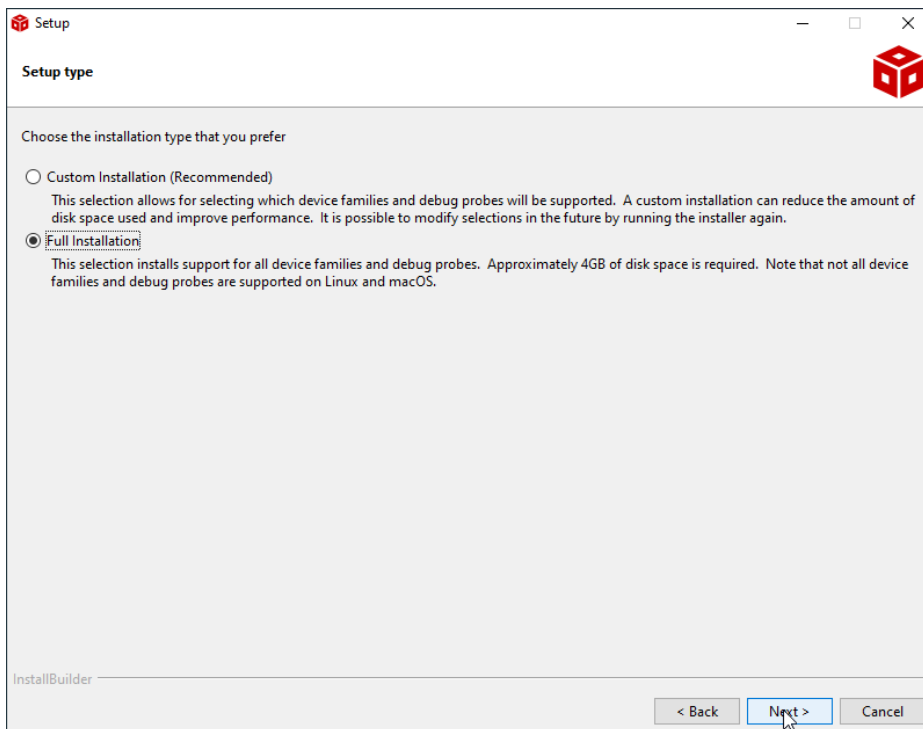

9. The following screen will run a few checks, click “Next” to continue.

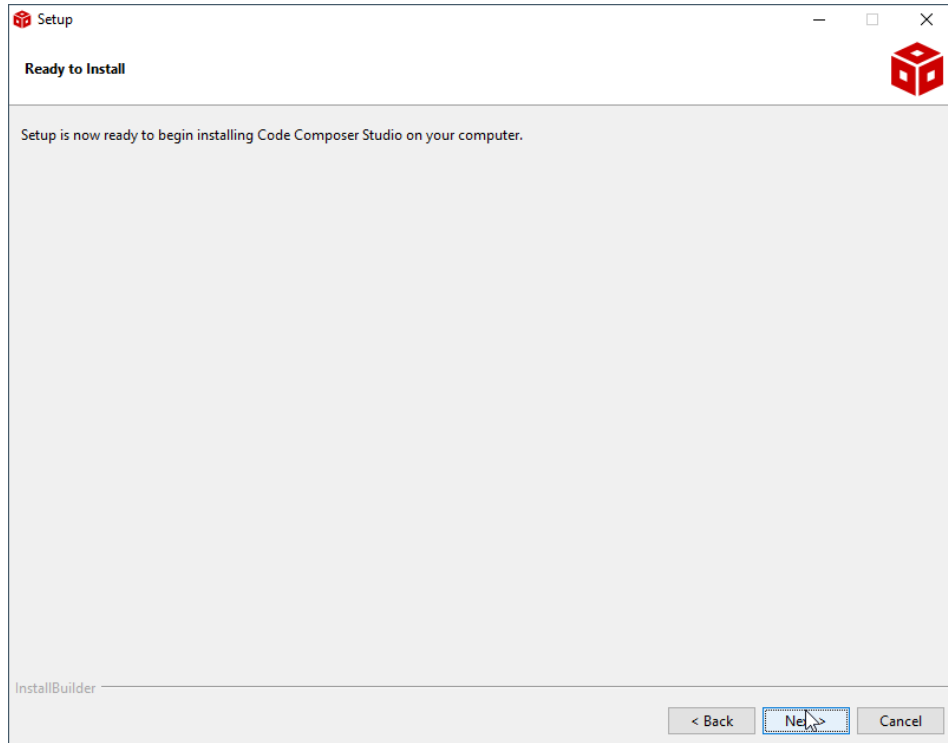

10. The following screen will be for setting where you would like Code Composer Studio to install to. We will use the default destination, Click “Next” to continue.

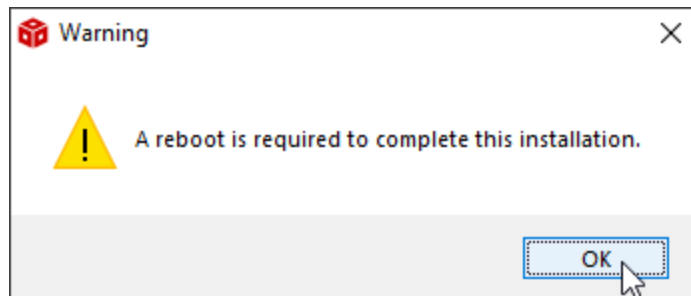

11. You will then be prompted by the setup type page, select “Full Installation” and click “Next” to continue.

12. You will then be prompted that the installer is ready to begin, click “Next” to run the installer.

13. You will receive a warning that recommends you reboot your computer after the installation is complete, click “OK” to continue.

14. Setup is now complete, click “Finish”. Reboot your computer and Code Composer Studio is ready to be used.
